SHOES

spring/summer

All shoes are handcrafted from high quality natural leather and packaged in environmentally friendly materials.

WHAT IS *barefoot footwear?*

Barefoot shoes are designed to be wide, thin, flat, and flexible, providing the sensation of walking barefoot. They're created to naturally strengthen your feet and ankles by allowing them to sense and adapt to changes in terrain. This not only improves your overall health, but also contributes to the wellbeing of your nervous system.

MINIMUS BAREFOOT *footwear collection*

Minimus barefoot shoes meet all the key criteria to provide an explicit barefoot experience for big and small. They are:

FLAT

with zero drop without cushioning. A flat sole provides the best foundation for a natural, upright posture and helps prevent knee, hip and back pain.

WIDE

for a natural foot shape, giving feet the much-needed freedom by allowing the toes to spread out in their natural position.

THIN & FLEXIBLE

with just 2 mm durable rubber outsole. Minimus sandals, shoes and boots allow you to feel the ground beneath your feet and connect with the environment in a natural way.

These boots offer both comfort and safety with their super-soft and flexible leather outsole. The thin rubber outsole allows children to move freely without any restrictions. Slightly longer at the ankle, these boots are secured with two velcro straps for a snug fit.

Made from genuine leather with a natural sheepskin lining, these boots prioritize softness and flexibility, essential for little first walkers' growing feet. In the Skylark 2 update, we've widened the toe-box ensuring ample room for healthy foot development.

Skylark ankle boots are perfect for young children taking their first steps outside in spring or autumn.
